FOREST CONSERVATION AREA DO NOT DISTURB

DUMPING OR STORAGE OF ANY MATERIALS PROHIBITED

VIOLATIONS ARE SUBJECT TO FINES IMPOSED BY THE MARYLAND FOREST CONSERVATION ACT OF 1991

Notes:
1. Bottom of signs to be higher than top of tree protection fence.
2. Signs to be placed approximately 50 feet apart. Conditions on site affecting visibility may warrant placing signs closer or farther apart.
3. Attachment of signs to trees is prohibited.
ALL PERMANENT SIGNAGE TO BE PUT IN PLACE PRIOR TO FINAL INSPECTION.

Source: Adopted from Forest Conservation Manual, 1996

| Construction Signs and Permanent Signs | Figure C-4 |

SEQUENCE OF FOREST PROTECTION

☐ All temporary protection devices (Wire Tree Protection Fence) and permanent devices (Signage) to be put in place.

☐ A pre-construction meeting will be required after boundaries of the limits of disturbance have been staked and flagged and the forest protection devices have been installed, and before any disturbance has taken place on site. It is the owner and/or developer's responsibility to arrange for the Washington County Planning Department (240-313-2430) inspection of these devices prior to the start of construction with at least five (5) days notice.

☐ Clearing and/or grading of site for construction of streets and/or lots, utility and septic areas.

☐ Protection devices shall be maintained throughout construction.

☐ All protection devices shall remain in place until all construction has ceased in the immediate vicinity.

☐ Temporary protection devices to be removed after construction has taken place.

☐ And to have all permanent devices put in place (Signage).

☐ A post construction meeting will be required after construction is completed on individual lots within the vicinity of the Forest Retention Areas. It is the owner and/or developer's responsibility to arrange a meeting with the Washington County Planning Department (240-313-2430).

FOREST CONSERVATION WORKSHEET
Version 2.2

NET TRACT AREA:
A. Total Tract Area (Lots 3 and 4) — A = 2.10 Ac.
B. Deductions (Critical Areas, area restricted by local ordinance or program) — B = 0
C. Net Tract Area   Net Tract Area = Total Tract Area (A) − Deductions (B) — C = 2.10 Ac.

LAND USE CATEGORY: ___MDR___

D. Afforestation Threshold (Net Tract Area (C) x 25 %) — D = 0.42 Ac.
E. Conservation Threshold (Net Tract Area (C) x 20 %) — E = 0.53 ac.

EXISTING FOREST COVER:
F. Existing Forest Cover within the Net Tract Area — F = 0
G. Area of Forest Above Conservation Threshold
   If the Existing Forest Cover (F) is greater than the Conservation Threshold (E), then
   G = F − E; Otherwise G = 0 — G = 0

BREAK EVEN POINT:
H. Breakeven Point (Amount of forest that must be retained so that no mitigation is required.)
   (1) If the Area of Forest Above the Conservation Threshold (G) is greater than 0, then
       H = (0.2 x the Area of Forest Above the Conservation Threshold (G) + the Conservation Threshold (E);
   (2) If the Area of Forest Above the Conservation Threshold (G) is equal to 0, then
   H = Existing Forest Cover (F). — H = 0
I. Forest Clearing Permitted without Mitigation
   I = Existing Forest Cover (F) − Breakeven Point (H) — I = 0

PROPOSED FOREST CLEARING:
J. Total Area of Forest to be Cleared — J = 0
K. Total Area of Forest to be Retained
   K = Existing Forest Cover (F) − Forest to be Cleared (J) — K = 0

PLANTING REQUIREMENTS:
   If the Total Area of Forest to be Cleared (K) is at or above the Breakeven Point (H), no planting is required and no further calculations are necessary (L=0, M=0, N=0, P=0); Otherwise, calculate the planting requirement(s) as follows:
L. Reforestation for Clearing Above the Conservation Threshold
   (1) If the Total Area of the Forest to be Retained (K) is greater than the Conservation Threshold (E), then L= the Area of Forest to be Cleared (J) x 0.25;
   (2) If the Forest to be Retained (K) is less than or equal to the Conservation Threshold (E), then L = Area of Forest Above Conservation Threshold (G) x 0.25 — L = 0
M. Reforestation for Clearing Below the Conservation Threshold
   (1) If Existing Forest Cover (F) is greater than the Conservation Threshold (E) and the Forest to be Retained (K) is less than or equal to the Conservation Threshold (E), then M = 2.0 x (Conservation Threshold (E) − Forest to be Retained (K));
   (2) If the Existing Forest Cover (F) is less than or equal to the Conservation Threshold (E), then L = Area of Forest Above Conservation Threshold (G) x 0.25 — M = 0
N. Credit for Retention Above the Conservation Threshold
   If the area of Forest to be Retained (K) is greater than the Conservation Threshold (E), Then N = K − E — N = 0
P. Total Reforestation Required   P = L + M − N — P = 0
Q. Total Afforestation Required
   If Existing Forest Cover (F) is less than the Afforestation Threshold (D), then Q = Afforestation Threshold (D) − Existing Forest Cover (F) — Q = 0.42 Ac.
R. Total Planting Requirement   R = P + Q — R = 0.42 Ac. or 18,295 Sq. Ft.

Note: Use 0 for all negative numbers that result from the calculations.

I certify that I am a qualified professional per requirements of COMAR 08.19.06.01 for qualified professional status and, therefore, am qualified to prepare the attached Forest Stand Delineation Plan. I further certify that this plan was prepared by me or under my supervision using the methods provided by the Washington County Forest Conservation Ordinance and Forest Conservation Manual. I certify that this Forest Stand Delineation is accurate and complete.
